# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference 3293-01-WO	FOR FURTHER ACTION	See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)								
International application No. PCT/US 03/18720	International filing date (day/month	•								
International Patent Classification (IPC) or bo	oth national classification and IPC	10.55.2502								
Applicant · THE LUBRIZOL CORPORATION et al.										
This international preliminary examination report has been prepared by this International Preliminary Examining     Authority and is transmitted to the applicant according to Article 36.										
2. This REPORT consists of a total of 5 sheets, including this cover sheet.										
This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).										
These annexes consist of a total of	sheets.									
This report contains indications relations.	uting to the following items:									
I 🛛 Basis of the opinion										
II ☐ Priority										
		entive step and industrial applicability								
IV ☐ Lack of unity of invention V ☒ Reasoned statement un										
	der Hule 66.2(a)(ii) with regard to ns supporting such statement	o novelty, inventive step or industrial applicability;								
VI 🖾 Certain documents cited										
VII   Certain defects in the int	ernational application									
VIII	the international application

# INTERNATIONAL PRELIMINARY InterEXAMINATION REPORT - SEPARATE SHEET

International application No. PCT/US 03/18720

Re Item I

Basis of the opinion

Description, pages:

1-8

as originally filed

Claims, No.:

1-10

as originally filed

#### Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

#### Cited documents:

D1: US-A-5502175 D2: US-A-4687843 D3: US-A-5928657

### novelty:

The subject-matter of the present application concerns of an ethoxylated alkylglucoside, the terminal OH moiety being partially derivatised by fatty acids.

Since none of the cited prior art discloses the claimed compounds, the subject-matter of the present application is considered new.

### Inventive step:

D1, which is considered to represent the closest prior art, discloses similar compounds for use in cosmetic formulation but having shorter polyethoxy chains. These compounds are used in shampoos and bathing preparations.

D2 show similar compounds (polypropoxylated compounds) used in cosmetology but having a sum of propoxy side chains ranging from 5-50. These compounds are known as moisturisers and emolients which are specially suitable in skin care formulations.

D3 also discloses similar compounds (ethoxylated compounds) with a sum of ethoxy side chains ranging from 15-150.

Therefore, D2 and D3 strongly suggest the use of longer polyethoxy side chains.

Thus, the subject-matter of the present application is merely considered as an adaptation (combination of the teaching of D1 and D2/D3) of the prior art and therefore the subject-matter of the present application is not considered inventive.

#### remark:

The comparative tests disclosed in the application (on page 8) compare the compounds of the present application with Cetiol HE, which is considered structurally too far from the compounds of the prior art to be taken into consideration.
